KODAK SV63 Bidirectional Interface Card

Description - The KODAK SV63 Bidirectional Interface Card provides the capability for an Apple™ Macintosh II Computer to communicate in both directions with the Kodak SV6500/6550 Color Video Printer. This allows the user to digitally store, retrieve, and manipulate SV6500/6550 color video images.

SV63 Features -

- **Allows complete use of all the features of the SV6500/6550 Color Video Printer and supporting software (such as the Utility software and the software driver)***
- **Allows digital storage and bi directional transfer capability of video images.**
- **Allows retrieval and modification of factory installed print density and enhancement tables. (For custom image manipulation.)**
- **Includes Printer Cable (TBD)**
- **Easily installed in any NUBUS slot in a Mac II. No configuration switches or jumpers need to be set.**

Customer Availability -

4th Period 1989 (CA based on SA plus 6 weeks)

* This software needs to be re-written from BM environment to Mac environment.
